

Anatomy of a Voyage to Freedom: An Exploration of the Underground Railroad

The Underground Railroad was a network of secret routes and safe houses used by enslaved people in the United States to escape to freedom in the North and Canada. The network was active from the 1830s to the 1860s, and it is estimated that over 100,000 people escaped slavery using the Underground Railroad.

The Underground Railroad was not a single organization, but rather a loose network of individuals and groups who worked together to help enslaved people escape. These individuals and groups included abolitionists, free Black people, white allies, and even some enslaved people themselves.

The Underground Railroad was a dangerous undertaking, and many people who attempted to escape were caught and returned to slavery. However, the network was also a success story, and it helped thousands of people to escape to freedom.
